

AYESHA NIKHATH S

AI/ML Engineer | Python Developer | Data Professional

Bangalore, Karnataka | +91-6366302944 | ayeshasi2128@gmail.com | <https://www.linkedin.com/in/ayesha-nikhath-s-066951253/>

PROFESSIONAL SUMMARY

AI/ML, Python, and Data professional with 2+ years of combined experience, including 1+ year as a Software Support Engineer and hands-on work experience as an AI Developer building end-to-end ML pipelines. Skilled in Python-based development across data analysis, automation, and application integration, with full-stack exposure. Currently applying AI-assisted development in ERP/backend support while expanding Generative AI/LLM expertise (RAG, prompt engineering) through hands-on coursework.

TECHNICAL SKILLS

Programming & Query Languages: Python, SQL, Core Java

Data Analytics & Visualization: Data Analysis, Data Cleaning, Data Preprocessing, EDA, Dashboarding, Reporting, Statistics, Excel, Power BI

Machine Learning & AI: Model Training & Evaluation, Generative AI, LLMs, RAG, Prompt Engineering, Computer Vision, Deep Learning, CNN, Model Optimization & Tuning

Libraries & Tools: Pandas, NumPy, OpenCV, PyTorch, TensorFlow, Scikit-learn, Matplotlib, FastAPI, Git, GitHub

Web Technologies: HTML, CSS, JavaScript, React.js

PROFESSIONAL EXPERIENCE

Data Science & Generative AI (Trainee / Internship) — Learnbay, Bangalore

Jun 2026 – Present

- Developing hands-on skills in Python, ML, Data Analysis, Deep Learning, LLMs, RAG, and AI application development.
- Building self-driven, AI-integrated full-stack projects to apply and extend Python and AI/ML development skills.

Technical Support Executive (ERP) — 21K School, Bangalore (Concurrent)

May 2026 – Present

- Apply AI-assisted development and debugging to troubleshoot ERP frontend/backend issues, identify root causes, and improve application workflows.
- Perform ERP data analysis and validation, leveraging AI tools to investigate data discrepancies and support technical and application-related issues.

AI Developer — Maskan Technologies, Bangalore

Nov 2025 – May 2026

- Built end-to-end AI/ML pipelines for textile applications, 2D-to-3D human reconstruction, body measurement extraction, and GAN-based Virtual Try-On of clothes on a 2D human body using Python, PyTorch, OpenCV, CNNs, and SMPL models.
- Engineered image preprocessing and multi-view dataset pipelines (OpenCV, NumPy) that improved 3D reconstruction accuracy, and applied 3D anthropometry with Pandas/SQL for apparel size estimation.
- Ran data preprocessing, validation, and model evaluation to boost prediction accuracy, while supporting full-stack integration and workflow automation for ML features.

Software Support Engineer — Tech Avant Garde, Bangalore

Jul 2024 – Nov 2025

- Supported a large-scale EdTech/HealthTech digital transformation project (hybrid learning, STEM/STEAM, skill development), delivering ERP frontend development features, UI enhancement, workflow, and backend issues.
- Analyzed ERP backend data using SQL to troubleshoot issues, validate transactions, and ensure accuracy across academic and administrative workflows.
- Performed data analysis, extraction, cleaning, and transformation for reporting and onboarding, and resolved L1/L2 support tickets within SLA timelines.

ACADEMIC PROJECTS

IoT-Based Wireless Charging for EVs — Major Project | Arduino IDE, IoT, RFID

- Built an IoT-based EV wireless charging system with transmitting/receiving coils and RFID-based automated payment processing.

Hospital Management System — Mini Project | MySQL, HTML, CSS, JavaScript

- Built a web-based system to manage patient records, appointments, billing, and staff information.

TRAINING & CERTIFICATIONS

- Full Stack Developer — Global Quest Technologies (Feb 2024 – Jun 2024)
- Python & Data Science — Konigtronics Pvt Ltd (Sep 2024 – Oct 2024)

EDUCATION

B.E. in Computer Science and Engineering

May 2024

Brindavan College of Engineering, Visvesvaraya Technological University — Bangalore | CGPA: 8.1
